

Setting up Unity and Visual Studio Code

1. Download and Install .NET 8.0

Build apps - SDK ⓘ

SDK 8.0.417

OS	Installers	Bins
Linux	Package manager instructions	Arm Arm
macOS	Arm64 x64	Arm
Windows	x64 x86 Arm64 winget instructions	x64
All	dotnet-install scripts	

Download and install **.NET SDK 8.0** from the official Microsoft website.

Make sure the installation completes successfully. You can verify it by opening Command Prompt and running.

dotnet --version

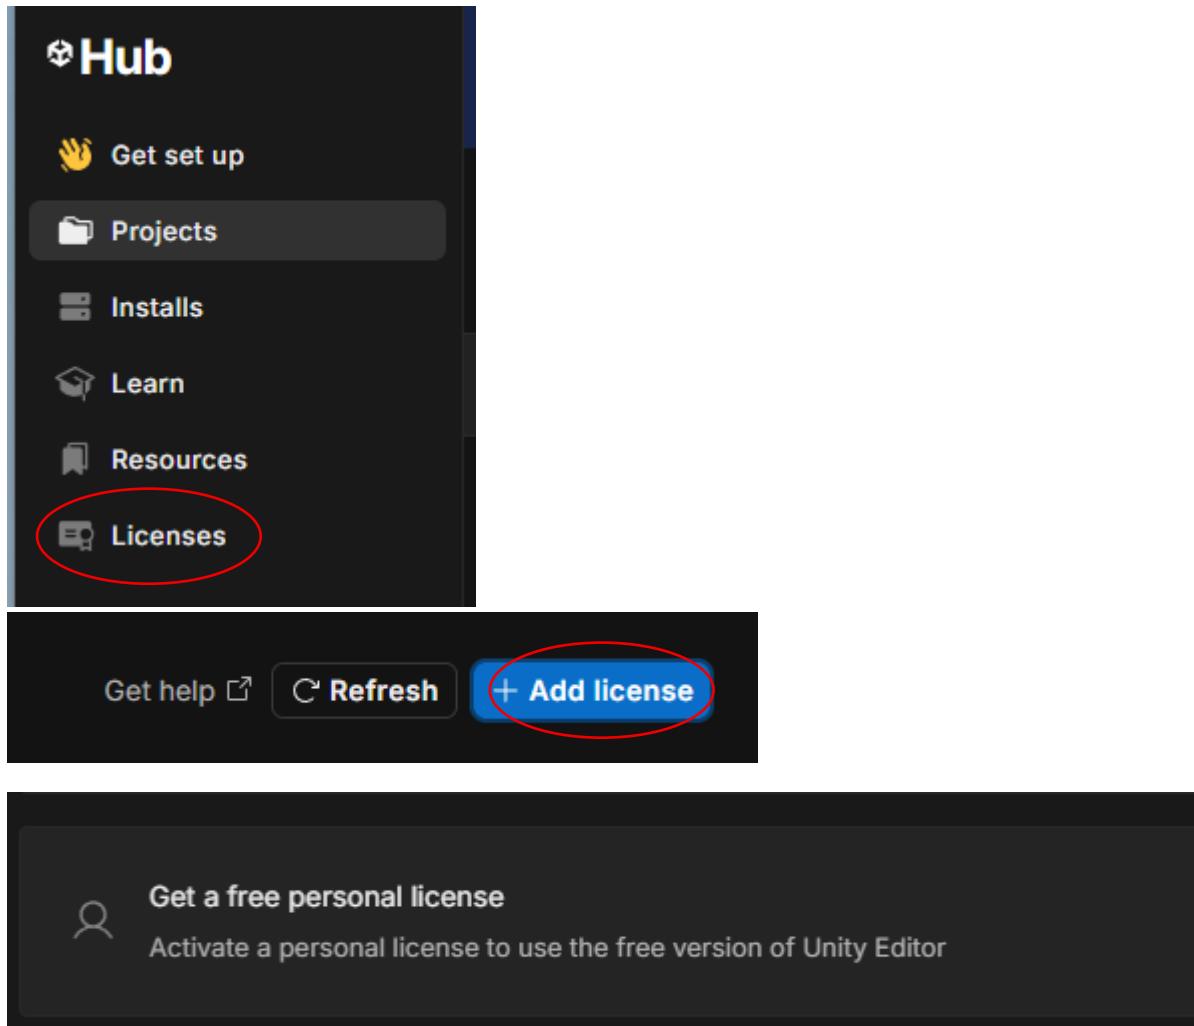

2. Download and install Unity Hub

<https://unity.com/download>

Create a Unity account if you don't already have one and sign in using Unity Hub.

After signing in, go to **Settings → Licenses** inside Unity Hub.

Click **Add License → Get a free personal license** and activate it.

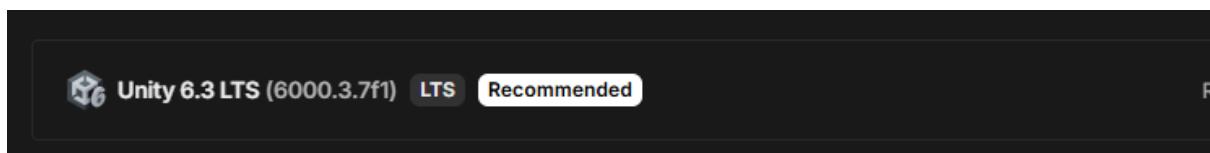

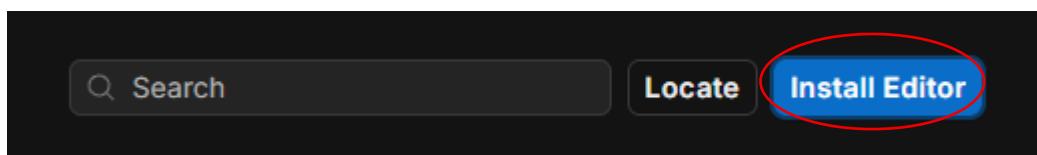

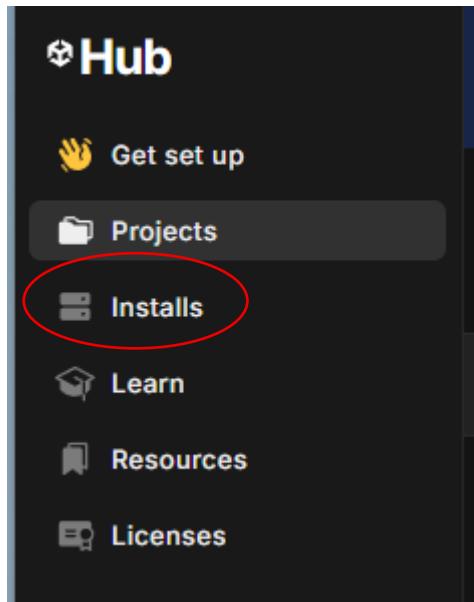

Go to the **Installs** tab in Unity Hub.

Click **Install Editor** and download **Unity 6.3 LTS**.

You do not need to install any additional modules at this stage.

If required, you can change the download and install location of Unity editors by going to **Settings → Installs** in Unity Hub before installing.

3. Setting up VSC with Unity

Open **Visual Studio Code**.

Go to the Extensions panel and install **C# (by Microsoft)**.

Open Unity Hub and create a **New Project**.

Select the **Universal 3D** template.

Set the project name and location.

Click **Create Project**.

Inside Unity, open the **Package Manager** by going to

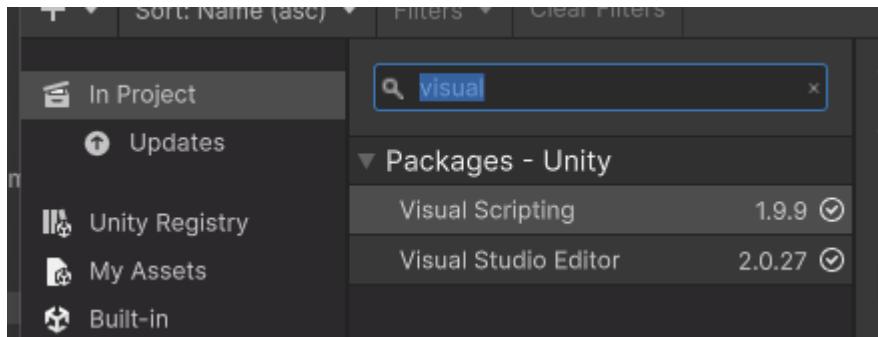

Window → Package Management → Package Manager

In the Package Manager window, set the dropdown to **In Project**.

Search for **Visual Studio Editor**.

Update it to the latest version.

If it is not installed, install it first and then update.

Visual Studio Editor
2.0.27 · February 04, 2026
From [Unity Registry](#) by [Unity Technologies](#)
[Documentation](#) | [Changelog](#) | [Licenses](#)

[See other versions](#)

Now go to

Edit → Preferences → External Tools

Set **External Script Editor** to **Visual Studio Code**.

If Visual Studio Code does not appear in the dropdown, click **Browse** and locate the VS Code executable manually.

After selecting the editor, click **Regenerate Project Files**.
